A NEW ECO POOL IN DUONA ELEMENTARY SCHOOL COMPLETE

The Corner Team of Construction Engineering Department handed over the ecological pool to Duona Elementary School at [the ribbon-cutting ceremony](#).

MAKING A POSITIVE IMPACT TO SOCIETY

We dedicate our knowledge and efforts hoping our small actions to bring a difference to corners in remote villages.

All of this contributed to the success of our USR projects that we held here in southern Taiwan.

STUDENT-ATHLETES SHINE IN THE 2021 NATIONAL INTERCOLLEGIATE ATHLETIC GAMES

NKUST student-athletes have won 11 medals at the NIAG in the [NKUST's best-ever NIAG showing](#).

SPORTS ADMINISTRATION HELD EVENT TO PROMOTE WATER SAFETY

SA Open Water Sports Education Center at the Southern District held an event to encourage elementary students to play with [water sports facilities with safety knowledge on Nov 5](#).

TSMC Day at NKUST

The world-leading **foundry** Taiwan Semiconductor Manufacturing Company (TSMC) was **on the prowl** for top young talent. TSMC Day went on Oct 27 and Oct 28, and the TSMC mobile recruitment bus parked on the boulevard right in front of the library, attracting attention from students walking by.

TSMC held this **recruitment** event in the hope of recruiting 1,500 students, and it's primarily seeking candidates with a graduate degree. The mobile recruitment bus parked at First Campus for two days, and it has attracted over 300 students from the rest campuses to join the event. Its recruiters were impressed by the **pro-active** attitude of our students.

NKUST has been continuing to **cultivate** students familiar with their skills and apply their knowledge during internship programs. These efforts have made our grads **sought-after** among domestic firms.

Alumni Service and Career Development Center (ASCDC) Chair Marian Lee said: "It takes years with thousands of our grads efforts to build such a good image to industries, who see our new grads as excellent as their predecessors. Every year, we have 1,000 students join internship programs, and many firms also take this opportunity to **reserve** talent."

Vocabulary

1. **foundry** **n** (半導體)晶圓代工
