## Asian Development Bank and the University of Philippines Make Return Visit to NKUST

Amid the rapidly developing international situation, Taiwan has a strong political and economic foundation, leading advantages in industrial technology and educational level. Only five member countries and regions of the Asian Development Bank (ADB) are listed as economically advantaged countries, and Taiwan is one of them. This highlights Taiwan's valuable advantages and represents Taiwan's responsibility for regional development and sustainability.

A delegation from the Asian Development Bank (ADB) and representatives from the University of the Philippines (UPS) visited the University on Mar 27. The delegation was impressed by the optimized aquaculture cultivation techniques developed by the University.

They were particularly amazed at the cultivation techniques of high-value fish species such as grouper and the sustainable and healthy cultivation technology using photosynthetic bacteria to improve the aquaculture environment. For ADB member countries that still need to improve their development levels, enhancing agriculture and fishery technology is also critical to advancing regional development.

### Vocabulary

1. **represent** **v** 展現；表現
2. **representative** **n** 代表
3. **delegation** **n** 代表團
4. **optimized** **a** 優化的；完善的
5. **aquaculture** **n** 水產養殖
6. **species** **n** (動植物的)物種
7. **grouper** **n** 石斑魚
8. **critical** **a** 式關鍵性的；決定性的
